**STORMDEFENDER**

Liberty Collection Windows

Coastal Lighthouse

# STORMDEFENDER

Liberty Collection windows with the Storm Defender option are built to withstand hurricanes and other extreme storm conditions for our coastal customers. These products are both beautiful and dependable. Storm Defender products provide the following benefits:

- Strong laminated glass resistant to wind borne debris
- Added UV protection to minimize interior fading
- Lowered sound transmission
- Increased forced entry resistance
- Low E glass option available
- DP 55 for double hungs

Liberty Collection products with our Storm Defender option can be used in Wind Zone 2 coastal areas. These products have been tested to the ASTM E 1996 standard which includes an impact test to withstand a 4.5 lbs four foot 2x4 traveling at 40 feet per second. Powerful cyclic static air pressure testing with loading in both the positive and negative direction ensures our windows will give you peace of mind in these vulnerable coastal regions.

Tough but beautiful, our Liberty Collection products with the Storm Defender option outperform the competition. Interior wood options like natural pine, oak or maple and custom exterior color options are available. Various standard and custom grill configurations including simulated divided lites and several brickmold options allow you to add curb appeal while increasing the safety of your home.

Storm Defender laminated glass is provided with a 10 year warranty.

Ask your Pollard Representative for more information on these products.
